

# TCU Version Changes

## Explanation 2.20.1.A (Example)

2. PC Software Version

20. TCU Com – (21. TCU Com +)

1. Protocol Version

A. Firmware Version

2.2.0.0 This is the first TCU Test release version. A few bugs may still be resident but should not hamper the basic operation.

2.2.1.0 This is the first official release version.

New Feature is **TCC Off TPS High & Low** values to set the lockup engage pattern.

Map scaling is now fixed. The Engine max RPM will determine how far the map graph RPM will display.

A few bugs may still be resident but should not hamper the basic operation.
